

TOSHIBA

Portable Sound System TY-ASC60

SKU: TY-ASC60

A PARTY SCENE FROM THE FUTURE

The TY-ASC60 Portable Party Speaker has been designed to utilise Bluetooth ver 2.1 EDR,

which gives the user device sync for up to 10 meters (or 33 feet). Along with that, the speaker comes with 2 USB ports for easy device connectivity. The easy-to-use, and easy-to-connect, speaker system thus promises exciting party and sound experience, all without the hurdles of complex wiring and technical know-how of clunky sound systems.

With an operating time of almost 5 hours, as well a 60W power output, the speakers guarantee a seamless musical experience. An in-built equaliser allows for easy tinkering and customisation of the tracks being played. The sound profile also includes Extra Bass, which transforms your music reality to a whole new level.

CHANGING THE FACE OF SOUND SYSTEMS

The speaker is perfect for a variety of events, since it creates options outside of pre-prepared playlists and pure reliability on an external musical device. It has 2 ports for external microphone attachments, and an FM receiver with a digital frequency tuner - thus, providing more options for an all-round event planning. Whether you wish to use an external USB drive, dance along to the music playing live on air, or add some live vocals to the mix - the Toshiba Portable Party Speaker with Extra Bass has you sorted.

At almost 60cm tall, the TY-ASC60 is a tiny powerhouse of energy and bass boosted sound. Easy to transport to any event of your choice, the Toshiba Portable Party Speaker is the perfect companion to bring along. This party guest is welcome anywhere, giving the listeners an immersive sound experience like never before. Combined with the party lights, it's not so much a clunky technical necessity but a suave new addition to the event management world. This one deserves a party invite of its own.
